

## Sudden Cardiac Arrest on the Golf Course

Are you up to Par?

## Did you know...

- Golf courses are the fifth most likely place for a Sudden Cardiac Arrest to occur
- As the mature golfing population grows, the number of medical emergencies that can occur on the course increases
- For every one minute delay in defibrillation, the survival rate of that patient decreases by ten percent
- Ninety-five percent of those who experience SCA die because they do not receive life-saving defibrillation within four to six minutes

Iridia Medical is a preferred partner of the PGA of BC Association and is offering PGA of BC member facilities a preferred rate of \$1,596.00 (plus tax & shipping) on the following industry leading AEDs:

- Physio-Control LIFEPAK CR Plus
- Cardiac Science Powerheart G3 Plus

Both AEDs are designed for the lay rescuer, have step-by-step voice prompts and are easy to use in the event of a cardiac emergency.

For more information or to request an in-person AED demonstration, please call Julie Turley at 604-685-4747. For more information about Iridia Medical, please visit [www.iridiamedical.com](http://www.iridiamedical.com)
